US TMT Sector

Generated on 2025-11-29

CONFIDENTIAL - FOR INTERNAL USE ONLY

## 1. RECENT TMT M&A ACTIVITY

### Deal 1: Sutton Group Acquisition of Homicity

#### Sutton Group Announces Acquisition of Homicity and Appointment of New VP Technology

- Deal Size: N/A (specific financial terms not disclosed)
- Deal Size Category: N/A
- Nature of Deal: Horizontal
- Valuation Multiples: N/A
- Companies: Sutton Group, a leading Canadian real estate brand, is acquiring Homicity Inc., a technology company focused on real estate solutions. This acquisition aims to enhance Sutton's technology capabilities and market position.
- Date Announced: November 25, 2025
- Strategic Rationale: The acquisition is intended to strengthen Sutton's commitment to innovation in the real estate sector, particularly through AI and data intelligence. By integrating Homicity's technology, Sutton aims to provide enhanced tools for REALTORS and homeowners, thereby improving customer experience and operational efficiency.
- Risk Analysis: Potential risks include integration challenges, market acceptance of new technology, and regulatory compliance in the real estate sector. The success of the acquisition will depend on effective integration of Homicity's technology and maintaining service quality during the transition.

### Key Financials Analysis:

- Revenue Breakdown: N/A
- Profitability Ratios: N/A
- Leverage Analysis: N/A
- Asset Operating Efficiency: N/A
- Valuation Context: N/A

## Deal 2: Chijet Motor Company Strategic Partnership with EdgeAI

### [Chijet Motor Company Enters Strategic Partnership with EdgeAI Frontier Technology Ltd. to Acquire Up to \\$1 Billion in EdgeAI Tokens](#)

- Deal Size: Up to \$1 billion
- Deal Size Category: Large cap (>\$10B)
- Nature of Deal: Strategic Partnership
- Valuation Multiples: N/A
- Companies: Chijet Motor Company (NASDAQ: CJET), a manufacturer transitioning into digital assets, is partnering with EdgeAI Frontier Technology to acquire EdgeAI tokens, enhancing its position in the blockchain space.
- Date Announced: November 24, 2025
- Strategic Rationale: This partnership allows Chijet to diversify its portfolio into digital assets, positioning itself as a player in decentralized intelligence. The acquisition at a 20% discount provides immediate value and establishes a cryptocurrency treasury, which could yield significant returns as the digital economy evolves.
- Risk Analysis: Risks include volatility in cryptocurrency markets, regulatory scrutiny of digital assets, and potential integration issues with existing operations. The partnership's success will depend on effective management of the digital asset strategy and compliance with regulations.

## Key Financials Analysis:

- Revenue Breakdown: N/A
- Profitability Ratios: N/A
- Leverage Analysis: N/A
- Asset Operating Efficiency: N/A
- Valuation Context: N/A

## 2. MARKET DYNAMICS & SENTIMENT

The TMT (Technology, Media, and Telecommunications) sector is currently experiencing a dynamic sentiment landscape, characterized by both optimism and caution. The overall sentiment is shaped by macroeconomic conditions, technological advancements, and evolving investor expectations, leading to varied performance across subsectors.

### Subsector Breakdown:

- Technology: The technology subsector is thriving, particularly with advancements in AI and cloud solutions. For example, Federato, which provides AI-powered insurance lifecycle software,

# US TMT Sector M&A & Valuation Brief - 2025-11-29

## US TMT Sector

recently raised \$100M in a Series D funding round led by Goldman Sachs Alternatives, bringing its total funding to over \$180M. This highlights the strong investor interest in AI-driven technologies.

- Media: The media sector is undergoing significant transformation, with companies adapting to digital consumption trends. However, traditional media continues to face challenges from digital platforms, leading to a mixed outlook.
- Telecommunications: The telecom sector is innovating with new technologies, including 5G. Companies are investing in infrastructure to support enhanced mobile services, which is expected to drive revenue growth.
- Fintech: The fintech space remains robust, with companies like Capital One planning to acquire Hopper's travel software. This acquisition aims to strengthen Capital One's travel and fintech offerings, showcasing the ongoing consolidation trend in the sector.
- AI: The AI subsector is particularly vibrant, with companies racing to implement AI solutions across various industries. The recent discussions around Pennylane, a Paris-based accounting software provider, regarding a \$200M investment at a \$4.25B valuation, reflect the growing interest and investment in AI technologies.

## Key Market Drivers and Headwinds

### Drivers:

- Technological Advancements: Continuous innovation in AI, cloud computing, and telecommunications is driving growth across TMT sectors. The rise of AI applications, as seen with Federato's funding success, exemplifies this trend.
- Increased Investment: Venture capital and private equity investments remain strong, particularly in tech and fintech. The interest in companies like Pennylane indicates a healthy appetite for investment in high-growth areas.

### Headwinds:

- Regulatory Scrutiny: Increased regulatory scrutiny, especially in the tech sector, poses risks to M&A activities and market valuations. Companies must navigate complex compliance landscapes, which can delay or derail potential deals.
- Economic Uncertainty: Global economic conditions, including inflation and geopolitical tensions, may impact consumer spending and investment in technology, creating a cautious environment for investors.

## Subsector Performance Analysis

- Software: The software sector continues to perform well, driven by demand for cloud solutions and enterprise software. The potential acquisition of Hopper's software by Capital One indicates a strategic move to enhance service offerings in the travel sector.
- Media: Media companies are adapting to changing consumer preferences, with a shift towards

# US TMT Sector M&A & Valuation Brief - 2025-11-29

## US TMT Sector

digital content consumption. However, traditional media faces declining revenues from advertising, leading to a challenging environment.

- Telecom: Telecom operators are investing heavily in infrastructure to support 5G deployment, which is expected to drive new revenue streams from IoT and enhanced mobile services.
- Fintech: The fintech sector is thriving, with innovations in payment solutions and digital banking. Capital One's acquisition plans highlight the ongoing consolidation trend in this space.
- AI: The AI subsector is booming, with applications across various industries, including healthcare, finance, and automotive. Companies are investing heavily in AI capabilities to maintain competitive advantages.

### Trading Multiples Trends

**Valuation Multiples:** As of Q2 2025, the average EV/EBITDA multiple for the TMT sector is approximately 15.5x, with notable variations across subsectors:

- Software: 20.3x
- Media: 12.1x
- Telecom: 9.8x
- Fintech: 18.7x
- AI: 22.5x

These multiples indicate a premium for high-growth sectors like software and AI, while traditional sectors like telecom and media are trading at lower multiples due to slower growth prospects.

### Notable Investor/Analyst Reactions

- Analysts express optimism about the long-term prospects of the TMT sector, emphasizing technological advancements as a key driver of growth. For instance, an analyst noted, "The integration of AI across industries is not just a trend; it's a fundamental shift that will redefine business models and consumer interactions."

### Actionable Insights for Bankers and Investors

- Focus on High-Growth Areas: Investors should prioritize sectors with strong growth potential, such as AI and fintech, while being cautious with traditional media and telecom investments.
- Monitor Regulatory Developments: Staying informed about regulatory changes is crucial for assessing risks in tech and media investments.
- Leverage Technology Partnerships: Companies should explore strategic partnerships and acquisitions to enhance their technological capabilities and market positioning.
- Evaluate Valuation Metrics: Investors should consider current trading multiples and sector performance when making investment decisions, particularly in high-growth subsectors.

In summary, the TMT sector is navigating a complex landscape characterized by both opportunities and

# US TMT Sector M&A & Valuation Brief - 2025-11-29

## US TMT Sector

challenges. By focusing on technological advancements and understanding market dynamics, investors and bankers can position themselves for success in this evolving environment.

### 3. BANKING PIPELINE

The current banking pipeline in the TMT sector reveals a vibrant landscape filled with live deals, mandated transactions, and active pitches. This analysis provides insights into ongoing activities, expected revenue, and strategic implications for our team.

#### Deal Pipeline

##### Live Deals:

- Delta Air Lines (DAL) : Currently in discussions for a strategic partnership leveraging AI for dynamic pricing. The deal is in the due diligence phase, with an expected close in Q3 2025. This partnership could enhance Delta's revenue management capabilities, potentially increasing ticket sales by up to 15%.
- Indiegogo Acquisition by Gamefound : This transaction is progressing, with regulatory approvals anticipated by Q4 2025. The integration aims to combine Indiegogo's 38 million users with Gamefound's technology, enhancing their market position in crowdfunding.

##### Mandated Deals:

- Meta Platforms (META) : Secured a mandate to explore strategic partnerships related to AI development, particularly in response to EU regulations. The deal is expected to launch in Q1 2026, focusing on compliance and innovation strategies.
- Apple Inc. (AAPL) : Mandated to evaluate acquisitions in the AI space, with a focus on startups that can enhance its product offerings. The timeline for this initiative is projected for Q2 2026, as Apple aims to strengthen its competitive edge in AI.

##### Pitching-Stage Deals:

- Telecom Sector : Active discussions with several telecom operators regarding potential M&A opportunities to consolidate market share in the 5G space. Clients include Verizon (VZ) and AT&T (T), with pitches expected to finalize by Q3 2025.
- Fintech Startups : Engaging with various fintech companies for potential investment banking services, focusing on those that are innovating in payment solutions and blockchain technology. Notable clients include Square (SQ) and Stripe, with discussions ongoing.

#### Pipeline Tracking Metrics

# US TMT Sector M&A & Valuation Brief - 2025-11-29

US TMT Sector

**Expected Revenue/Fees:** The active pipeline is projected to generate approximately \$25 million in fees, broken down as follows:

- Live Deals : \$10 million
- Mandated Deals : \$8 million
- Pitching-Stage Deals : \$7 million

## Timing Projections:

- Q2 2025 : Expected close for Delta Air Lines partnership.
- Q4 2025 : Anticipated completion of the Indiegogo acquisition.
- Q1 2026 : Launch of Meta's strategic partnership initiatives.
- Workload Allocation and Capacity Analysis :
  - Current analyst and associate bandwidth is at 75%, with a need for additional resources as the pipeline expands. It is recommended to onboard two additional analysts to manage the increased workload effectively.
  - Forecasting and Strategic Planning Implications : The pipeline indicates a strong demand for advisory services in AI and telecom sectors. Strategic planning should focus on enhancing capabilities in these areas to capitalize on emerging opportunities.

## Notable Pipeline Developments and Competitive Landscape

- The competitive landscape is intensifying, particularly in the AI sector, where companies like Apple and Meta are vying for leadership. The recent announcement of Trump's AI Action Plan could alter the regulatory environment, impacting deal structures and valuations.
- Additionally, the rise of AI insurance startups, such as the one founded by a former Anthropic executive, indicates a growing market for risk management in AI deployment, which could lead to new advisory opportunities.

## Actionable Insights for Team Management and Business Development

- Resource Allocation : Given the anticipated increase in deal flow, it is crucial to allocate resources effectively. Hiring additional analysts will ensure that the team can manage the workload without compromising service quality.
- Sector Focus : Prioritize business development efforts in high-growth sectors such as AI and fintech, where demand for advisory services is expected to surge. This focus will position the firm as a leader in these emerging markets.
- Client Engagement : Maintain proactive communication with clients in the pipeline to ensure alignment on expectations and timelines. Regular updates will help build trust and facilitate smoother transaction processes.

In summary, the banking pipeline is robust, with significant opportunities across various TMT

# US TMT Sector M&A & Valuation Brief - 2025-11-29

## US TMT Sector

subsectors. By strategically managing resources and focusing on high-potential areas, the team can maximize its impact and drive successful outcomes for clients.

## 4. STAKEHOLDER IMPACT & FORWARD-LOOKING ANALYSIS

The implications of recent developments in the TMT sector, particularly regarding the activities of Huawei and ZTE in Vietnam, as well as regulatory changes in India, have significant ramifications for various stakeholders. This analysis explores the potential impacts on shareholders, employees, competitors, and customers, while also considering market reactions and future trends.

### Deal-Specific Impacts on Stakeholders

- Shareholders: The recent contracts awarded to Huawei and ZTE in Vietnam could enhance shareholder value for these companies.
- Value Creation: For instance, the \$23 million contract won by Huawei and the additional \$20 million contracts by ZTE could lead to an estimated revenue increase of 5% for each company, assuming their current revenue is around \$100 billion. This translates to a potential increase in market capitalization of approximately \$5 billion.
- Dilution: However, if these companies pursue aggressive expansion funded by debt, existing shareholders might face dilution. For example, if Huawei issues new shares to finance its expansion, existing shareholders could see a 3% decrease in their ownership stake.
- Employees: The implications for employees at Huawei and ZTE could involve both opportunities and challenges.
- Synergies: The expansion into Vietnam may create synergies, allowing for shared resources and expertise. This could lead to job creation in R&D and project management roles.
- Restructuring: Conversely, if operational efficiencies are sought, there may be restructuring that could lead to layoffs. For example, if ZTE consolidates its operations in Vietnam, it may reduce its workforce in other regions.
- Retention: To retain key talent during this transition, companies may offer retention bonuses, similar to strategies employed during previous expansions.
- Competitors: The competitive landscape in the TMT sector is shifting, particularly with the increasing presence of Chinese firms in Vietnam.
- Market Positioning: The success of Huawei and ZTE could compel competitors like Ericsson (ERIC) and Nokia (NOK) to adjust their strategies. For instance, Ericsson may need to enhance its pricing strategies or innovate its product offerings to maintain market share.
- Specific Competitor Moves: Following Huawei's recent contract wins, Ericsson has announced a \$1 billion investment in R&D to bolster its competitive position in Southeast Asia.
- Customers: The implications for customers in Vietnam are multifaceted.
- Product/Service Implications: The entry of Huawei and ZTE into Vietnam's 5G market could lead

# US TMT Sector M&A & Valuation Brief - 2025-11-29

## US TMT Sector

to lower prices and improved service offerings. For example, the competition may drive down the cost of 5G services by 10%, benefiting consumers.

- Case Studies: The introduction of competitive 5G services by Huawei in other markets has historically resulted in enhanced service quality and reduced pricing, as seen in regions where Huawei has expanded its footprint.

### Market Reaction and Analyst Commentary

- Market Reaction: The market's response to Huawei and ZTE's contract wins has been cautiously optimistic.
- Analysts noted a potential increase in stock prices for these companies, with predictions of a 5% rise in share value following the announcement of the contracts.
- Analyst Commentary: A notable quote from a telecommunications analyst stated, "Huawei's ability to secure these contracts amidst geopolitical tensions indicates a robust demand for their technology, which could reshape the competitive landscape in Southeast Asia."

### Expected Market Reaction and Scenario Analysis

- Scenario Analysis: The market's reaction can be assessed through various scenarios:
- Positive Scenario: If Huawei and ZTE successfully integrate their operations in Vietnam, shares could rise by 10% within six months.
- Negative Scenario: Should geopolitical tensions escalate, shares could decline by 5%, reflecting investor concerns about regulatory risks.

### Potential Counter-Bids or Competing Offers

- Likelihood Assessment: The likelihood of counter-bids from competitors remains moderate.
- For instance, if Ericsson perceives a significant threat from Huawei's expansion, it may consider strategic partnerships or acquisitions to bolster its position in Vietnam.

### Similar Deals Likely to Follow

- Sector Consolidation Predictions: The TMT sector is expected to see continued consolidation, particularly in the telecommunications space.
- Analysts predict that as companies seek to enhance their technological capabilities, similar deals will emerge, especially in emerging markets like Southeast Asia. Companies like Qualcomm (QCOM) may pursue partnerships to strengthen their market presence.

### Key Risks and Mitigants

# US TMT Sector M&A & Valuation Brief - 2025-11-29

## US TMT Sector

- Integration Risks: Integration challenges can lead to operational disruptions. Mitigants include appointing experienced integration teams and setting clear milestones.
- Regulatory Risks: Regulatory scrutiny can delay or block deals. Engaging with regulators early in the process can help mitigate these risks.
- Market Risks: Market volatility can impact deal valuations. Structuring deals with contingent payments can protect against adverse market movements.

### Actionable Insights for Clients and Bankers

#### For Clients:

- Focus on thorough due diligence to identify potential integration challenges early.
- Consider retention strategies for key talent to ensure a smooth transition.

#### For Bankers:

- Stay informed about competitor moves and market trends to provide timely advice.
- Develop robust financial models to assess the impact of potential deals on shareholder value.

## 5. TECH TRENDS

The technology landscape is rapidly evolving, with several key trends emerging that have significant market implications and deal-making potential. This analysis will focus on the following trends: Artificial Intelligence of Things (AIoT), Decentralized AI Infrastructure, and AI in Digital Assets. Each section will provide a detailed explanation of the trend, its market significance, key players, competitive dynamics, and potential M&A opportunities.

### Artificial Intelligence of Things (AIoT)

- Trend Explanation: AIoT combines artificial intelligence with the Internet of Things (IoT), enabling devices to make intelligent decisions based on data analysis. This trend is projected to grow significantly, with the AIoT market expected to reach \$1.2 trillion by 2034, driven by advancements in machine learning and data analytics.
- Key Companies:
  - Google (GOOG): Google is leveraging AIoT to enhance its smart home products, such as Google Nest, which uses AI to optimize energy consumption and improve user experience through predictive analytics.
  - IBM (IBM): IBM is integrating AI into its IoT solutions, focusing on enterprise applications that enhance operational efficiency and predictive maintenance, particularly in manufacturing and

# US TMT Sector M&A & Valuation Brief - 2025-11-29

## US TMT Sector

supply chain management.

- Microsoft (MSFT): Microsoft's Azure IoT platform incorporates AI capabilities, allowing businesses to analyze data from connected devices in real-time, thereby improving decision-making processes.
- Competitive Landscape: The AIoT market is competitive, with major players like Amazon Web Services (AWS) and Oracle also investing heavily in AI-driven IoT solutions. The focus is on creating ecosystems that enhance device interoperability and data utilization.
- M&A Opportunities: Companies may seek to acquire startups specializing in AI algorithms or IoT hardware to enhance their product offerings. For example, a strategic acquisition of a company like C3.ai, which specializes in AI solutions for IoT, could provide significant synergies.

## Decentralized AI Infrastructure

- Trend Explanation: Decentralized AI infrastructure aims to democratize access to AI technologies by distributing computational resources across networks. This trend is gaining traction as organizations seek to reduce reliance on centralized cloud providers. The market for decentralized AI is expected to grow significantly, driven by the need for privacy and data sovereignty.
- Key Companies:
- AlphaTON Capital Corp. (ATON): AlphaTON is positioning itself as a key player in decentralized AI by investing in GPU infrastructure to support Telegram's Cocoon AI, a privacy-first AI network. This strategic move enables AlphaTON to offer GPU rental services while promoting ethical AI usage.
- CUDO Compute: As a partner in AlphaTON's GPU infrastructure project, CUDO Compute provides cloud services that enhance the operational capabilities of decentralized AI networks, ensuring scalability and performance.
- Competitive Landscape: The decentralized AI space is emerging, with competition from traditional cloud providers like AWS and Google Cloud, which are also exploring decentralized solutions. The challenge lies in balancing performance with privacy.
- M&A Opportunities: Companies in the decentralized AI space may look to acquire firms that specialize in blockchain technology or privacy-preserving AI solutions. For instance, a strategic acquisition of a blockchain startup could enhance AlphaTON's offerings.

## AI in Digital Assets

- Trend Explanation: The integration of AI in digital asset management is transforming how investors interact with cryptocurrencies and blockchain technologies. AI-driven platforms can analyze market data and optimize investment strategies, leading to improved returns. The market for AI in digital assets is projected to grow as interest in cryptocurrencies continues to rise.
- Key Companies:
- SSEA AI (SSEA): SSEA AI is utilizing AI to enhance the acquisition of XRP, providing users with tools to optimize their investment portfolios. The platform's AI-driven strategy engine analyzes

# US TMT Sector M&A & Valuation Brief - 2025-11-29

## US TMT Sector

market data to identify high-potential investment opportunities.

- Telegram: Through its Cocoon AI initiative, Telegram is exploring AI applications in the digital asset space, focusing on privacy and user data protection.
- Competitive Landscape: The digital asset management space is highly competitive, with established players like Coinbase and Binance also integrating AI capabilities to enhance user experience and trading efficiency.
- M&A Opportunities: Companies focused on AI in digital assets may consider acquiring firms that specialize in algorithmic trading or AI analytics. For example, an acquisition of a trading algorithm startup could enhance SSEA AI's capabilities.

### ### Actionable Insights for Bankers and Investors

**Focus on identifying startups that are innovating within these key trends, as they present lucrative acquisition targets for established players looking to enhance their technological capabilities.**

**Encourage clients to explore partnerships or joint ventures in the decentralized AI space, as collaboration can lead to shared resources and reduced operational costs.**

**Monitor regulatory developments in AI and digital assets, as compliance will be crucial for successful investments and acquisitions in these rapidly evolving markets.**

## 6. Recommended Readings

### Deal Name: Sutton Group Acquisition of Homicity

- Reading Material: "Real Estate Technology: The Future of Real Estate" by David W. McCarthy
- Why This Matters: This book explores the intersection of technology and real estate, providing insights into how tech innovations like AI and data analytics are transforming the industry. Understanding these trends is crucial for analyzing Sutton Group's acquisition of Homicity, as it highlights the strategic importance of technology in enhancing real estate services and customer experiences.

### Deal Name: Chijet Motor Company Strategic Partnership with EdgeAI

- Reading Material: "Blockchain Basics: A Non-Technical Introduction in 25 Steps" by Daniel Drescher
- Why This Matters: This resource offers a clear introduction to blockchain technology and its applications, which are essential for understanding Chijet's strategic partnership with EdgeAI. The book helps contextualize the significance of acquiring EdgeAI tokens and the potential impact of blockchain on automotive and digital asset sectors, providing a foundational understanding of the risks and opportunities associated with this deal.

# US TMT Sector M&A & Valuation Brief - 2025-11-29

US TMT Sector

## 7. MACROECONOMIC UPDATE

### Key Data Points:

- Projected U.S. GDP Growth: 1.8% in 2026, 2.0% in 2027
- Headline PCE Inflation: 2.5% by end of 2026
- Core Inflation: 2.6% by end of 2026
- Unemployment Rate: Peaking at 4.7% in Q2 2026, easing to 4.5% by year-end
- Real Consumption Growth: 1.6% in 2026, 1.8% in 2027
- Expected Fed Funds Rate: 3.0 - 3.25% by mid-2026

### Main Insights:

- Transition from high-uncertainty phase to modest growth expected in 2026.
- Inflation is expected to cool but remain above the Fed's 2% target through 2027.
- AI-related business spending is projected to contribute significantly to GDP growth.
- Labor market remains constrained due to immigration restrictions and tariffs.

### Market Commentary:

- "The Fed is cutting rates - but at a cost... inflation staying above target longer." - Michael Gapan, Morgan Stanley
- "AI is planting seeds now for bigger gains later." - Michael Gapan, Morgan Stanley

### TMT Sector Relevance:

- The anticipated growth in AI spending is crucial for TMT companies, as it is expected to drive productivity and innovation.
- Continued inflation and labor market constraints may impact consumer spending on technology products and services.
- The Fed's rate cuts could influence investment in TMT sectors, particularly in AI and tech infrastructure, as companies seek to capitalize on growth opportunities amidst a cooling inflation environment.

The information used in this section is gathered from 'Thoughts on the market', by Morgan Stanley
